REC Release 2.6

Version 2.6.4 Released 1st July 2011.

Admin

- No changes

Marketing

- Social Media Console modified to remove the Google Alerts tab due to errors.

Store & Product Management

- Batch products processor now has the ability to select products to batch edit via manufacturer.

Payment Processors

- Thanks page failed text added, so now when a users fails to make the payment with a payment processor (currently only cardsave) then they get this failed text on the checkout page.

Content Management

- None

Design Enhancements

- None

Search Engine, Feeds & Data Import/Export Enhancements

- 2 new reports are now available – top performing keywords and a conversion funnel report.

General Code Maintenance & Database Improvements

- Renamed the favicon so existing stores won't have issues with overrides
